Union Carbide, Bhopal, 2-3 December 1984

“There was widespread belief among employees that the management had taken drastic and imprudent measures to cut costs and that attention to details that ensure safe operation were absent.”

D.A. Lihou

“Given the overall state of the Bhopal Union Carbide plant and its operation, if the action of inserting the slip disk had not been left out of the pipe washing operation that December day in 1984, something else would have triggered an accident.”

Leveson, p. 28

Complete - Includes structural and contextual information, the process that produced it and other linked documents

Comprehensive - Records the whole business process

Adequate - Fit for purpose for which it is being kept

Accurate - Correctly reflects what was communicated, decided or done
